Si estás abriendo un café de internet, o un punto (aula o centro) donde los clientes deban conectarse a internet y navegar previo pago, puede que te interese este software: Handy Cafe.Es gratuito y muy sencillo de usar. Puedes crear usuarios, es multilinguaje, puedes monitorizar los ordenadores, conectarte a ellos, sacar pantallazos , medir los tiempos de uso, reiniciarlos, generar informes, crear diferentes sistemas de precios y dispone de un firewall para controlar en dónde se navega.Muy completo y sencillo de usar si quieres crear algo parecido. Análisis SoftonicHandyCafe es un administrador de cibercafé gratuito que también sirve para gestionar otros tipos de redes públicas, como las de hoteles, estaciones o bibliotecas. Está traducido al español y cuenta con un abanico más que aceptable de funciones.Para dar tus primeros pasos con HandyCafe, instala la versión Server en la máquina de control y la Client en los demás ordenadores. El usuario de administración por defecto es ADMIN y la contraseña, PASSWORD. Tras el registro, que es gratuito, puedes usar HandyCafe sin limite de ordenadores o tiempo.Desde el panel de control de HandyCafe es posible hacer un seguimiento de los usuarios conectados y su tiempo restante, así como añadir minutos. Hay una pestaña para los socios y otra para los pedidos, así como un registro de eventos.Muy interesante es la opción Badwords, que desconecta a los clientes que escriban palabras prohibidas durante la sesión, y los avisos de consumo de ancho de banda. Por otro lado, en HandyCafe no hay una lista negra de procesos ni otras funciones de seguridad más avanzadas.Gestión de socios y preciosTemporizadores para comprobar el consumo/Consume pocos recursosLista negra de palabrasAyuda escasa y sin traducirPocas opciones de seguridad HandyCafe is a free Business software developed by Ates Software & Internet Technologies. The billing software is used for managing and integrating several computers on internet cafes.Used by Most Internet CafesHandyCafe has as been utilized for over 180 countries and more than 85,000 cyber cafes worldwide. Internet cafe managers need to facilitate their computers so that customers won't abuse their computer usage, check computer usage time, limit the access on Control Panel and prevent downloading of suspicious files.Managing Internet Cafe ComputersHandyCafe is designed with a easy to use interface and features that adapts to any scenarios. This will help not only the owners but also the internet cafe personnel to work professionally. The app provides a simple solution for monitoring and controlling local clients from a single server. Everything is conveniently facilitated from a single network system and a list of applications are inspectable so that users can close them from server when necessary. It consume less CPU and RAM so that operating an internet cafe is made more convenient. The software comes with HandyCafe Firewall v4 to block off dangerous intrusion from unknown sources. Users will never know when a malicious element will attack their local network. The software also includes a Filtering function to protect the local network. It's up to the user when to enable or disable USB connection for clients from the server. The app alerts if a USB device is recently plugged in or out. The app also alerts if customers type in or enter websites with inappropriate words and users can either force close pages or automatically send warning message to customers The app allows users to create membership account for their patron customers. They can offer special prices and discounts, at the same time track them easily. If customers are overflowing, they can be reordered with User Queue. The app supports most languages and users can develop custom languages with the language tool. Users can take screenshots from their servers to a selected computer or simultaneously to every computer. As a software for internet cafes, users can set up time to compute how much would they charge to their customers. They can generate well-written transaction from the customer's activities. They can even print or export the charges, reports, tickets or tracking done to their customers. The app handles transactions like logging in, logging out and paying out through its selections like Play & Pay, Time Limited logins, Prepaid and so much more. The app includes Multiple Pricing Schemes to show pricing rates by hour, day and time, the daily pricing and available discounts. When it comes to handling money, the app has a cashier feature for facilitating unlimited cashier accounts for Server. Users can control them, as well as enable or disable any account features. Users can also sell snacks to customers with the app's Cafeteria feature. This app can remotely wake up, shut down, reboot or log-off computers from the server. Users can personalize their client's colors, appearance and fonts. They can also advertise by inserting banners ad pages on the client screen-saver menu. If customers have inquiry to users, they can communicate via Messaging or redirect to a website. The app comes with client update and immediate retrieval of license information to their registered email.Internet Cafes' ChoiceEven if home gaming is more popular today, some customers still tend to rent computers. HandyCafe can help internet cafe owners to manage their computers easily.Tracking of prints from the serverPerforming printer processesReporting of print results to the customerThe open control is a built-in feature in this version as wellIt is possible to broadcast commercials as full screen on monitors of all client PCsThis broadcasting module supports all kinds of media formatsWith HandyCafe you can correctly manage your cybercafe. Thanks to the firewall feature, your computer will be completely protected against harmful web based attacks. You can access all computers in your network directly with HandyCafe's remote control system and make all the changes you need without moving from your desk.HandyCafe lets you open individual accounts for all cashiers and employees and give authorization as you wish. You can also report all revenues of cashiers and processes at any time. HandyCafe has a design that enables you to monitor and manage all computers totally or individually.You can automatically supervise the printer in your internet cafe while your customer is using it, and then price the process. HandyCafe makes your timing process for other income provider tools and games like PlayStation, Backgammon, Billiards, Chess, etc., and reports all results. All operations in your cafe will be easily done due to reliable and easy to adjust price options. Lost your license? Enter your registered email address below: If you are using earlier versions of HandyCafe Internet Cafe Software, click here to update. Do you need help?
